ABOUT BENARA NURSERIES

Founded in 1963, Benara Nurseries stands as a prominent, family-owned wholesale production Nursery situated in Western Australia. Spanning 147 hectares in Carabooda, the nursery grows a wide range of potted plants for the retail, landscape and revegetation industry.

Benefiting from a cumulative experience of over two centuries in plant production for the horticultural industry, the Third Generation of Benara Nurseries bring unparalleled expertise to the table. Our workforce, which consists of over 300 committed full-time and part-time employees, includes a core team of up to 50 key staff members with horticultural qualifications. Many of these proficient individuals have been valuable members of our team for a decade or longer, playing crucial roles in the sustained success and respected reputation of our company.

Benara Nurseries prides itself on its skillful and committed Propagation Department, which meticulously cultivates plants from seeds, cuttings, and tissue culture according to rigorous schedules. Our extensive range encompasses more than 1500 species, including both exotic and native varieties, potted across various sizes. This painstaking process yields an annual production exceeding 5 million potted plants. Additionally, we annually produce over three million flower and vegetable seedlings, further solidifying our commitment to excellence in plant propagation.

The nursery produces numerous revegetation lines, generating several million tubes and cell trays annually for key landscaping projects, revegetation, land rehabilitation and reforestation.

SERVICES

Revegetation & Forestry

Driven by our commitment to restore natural habitats, we've established a dedicated native revegetation department. Leveraging our expertise, we specialise in propagating top-quality native tube stock tailored for revegetation and landscaping projects.

Seedlings

Benara Nurseries boasts one of Australia's most advanced and automated seedlings nurseries. Employing cutting-edge techniques such as soil pasteurization, germination chambers, roller benches, robotic planting machines and boom watering facilities.

Trademart

Our two Trademarts are strategically positioned on both the North and South sides of the Swan River. These Trademarts offer convenient access to our assortment of plant varieties, seedlings, advanced feature trees, ornamental pottery, and an allied range of fertilizers, potting mix and mulch.

Distribution and Delivery

Our own transport fleet ensures plants are delivered to site with great care and arrive in the best possible condition. Landscapers' requests are met as much as possible, and regular visits to retailers throughout the week ensures constant top ups of fresh nursery stock.

TREE GROWING STANDARDS

Benara Nurseries is accredited to the Australian Plant Production Standard (APPS), the overarching framework for the Australian nursery industry's Best Management Practice programs. APPS includes on-farm systems for production nurseries, growing media manufacturers, and greenlife markets, emphasizing compliance in Plant Protection, Biosecurity, Environmental, and Natural Resource Management.

To be an accredited production nursery under APPS, adherence to the Australian Plant Production Standards Best Practice Guidelines is essential. These guidelines, crafted over years by industry experts, outline the 'Best Management Practices' encompassing technical and managerial requirements.

GET THE LOOK

As the Winter season approaches and the demand for outdoor heating solutions increases, there is a strategic emphasis on creating inviting outdoor spaces. To establish a desired Winter atmosphere, careful plant selections become essential. Among the chosen plants, Strelitzia, commonly known as Bird of Paradise, offers a tropical aesthetic with its vibrant blooms and sizeable foliage, serving as a focal point. Additionally, Dichondra's trailing vines contribute to the ambience with their delicate appearance, while carefully selected trees and hedging provide structural elements and privacy. The hardy Westringia, thriving in cooler temperatures, offers a contrast with its silver foliage against the warmth of the fire. These intentionally chosen plants collectively enhance the outdoor environment, providing a welcoming and aesthetically pleasing backdrop for gathering around the firepit during the Winter season.

LANDSCAPE ARCHITECTURE

HEART LEAF PEA

CHORIZEMA CORDATUM

Climber / Evergreen / Native Australian Plant /
Outdoor / Perennial / Shrub / Verge
Dimensions : 1.2m high x 1.2m wide

Chorizema cordatum is a small evergreen Australian native shrub with leathery heart shaped cordate leaves and small multicoloured pea shaped flowers in tones of orange-pink-red and yellow. Flowers are produced from winter through to summer. This easy to grow ornamental is suitable for garden beds, borders, containers and will grow as a climber if given adequate support. Position in part shade to full sun and plant in an area with moist well drained soil. Prune after flowering to maintain compact growth.

WAX FLOWER

PHILOTHECA CASCADE OF STARS

Evergreen / Outdoor / Perennial / Shrub

Dimensions: 50cm high x 50cm wide

An evergreen small shrub with masses of soft pink buds opening to white star-shaped flowers during early spring, Philotheca Cascade of Stars is ideal for pots, rockeries, and small gardens. It is a hardy plant for most positions, as its cascading growth and masses of flowers make a lovely display. Plant in full sun in well-drained soil. This plant is also low-maintenance and requires minimal pruning, making it perfect for those who want a beautiful garden with little effort.

GREVILLEA

Grevillea, a diverse genus of flowering plants indigenous to Australia, boasts an extensive array of over 350 species. Renowned for their distinct flowers and foliage, grevilleas manifest in many forms, ranging from shrubs and trees to groundcovers. Their allure lies in their aesthetic appeal and their capacity to entice birds and other wildlife to the garden, courtesy of their nectar-laden blooms. They serve as both vibrant accents and effective ground covers, enriching outdoor spaces with colour and texture, all while demanding minimal upkeep.

KINGS PARK CELEBRATIONS

Anigozanthos 'Masquerade' stands out as a captivating Kangaroo Paw cultivar, notable for being the first blue variety in the species. Its vibrant teal, purple, and green blooms atop tall stems create a striking appearance that instantly captures attention. With its unique colouration and straightforward maintenance needs, 'Masquerade' presents an excellent option for introducing bold hues to garden beds or containers basking in sunny locations.

Anigozanthos Celebrations Masquerade PBR

HEUCHERA

Heuchera 'Sugar Plum' is a striking plant and is a terrific choice for adding a touch of colour to shady areas of the garden. This fast-growing selection forms a sturdy mound of maple-like ruffled leaves in frosty silvery plum with contrasting darker veins. The leaf colour changes with the season from red-purple to silvered-purple and 30cm tall sprays of white bell shaped flowers appear in June. This fantastic plant is perfect for mixed containers in outdoor entertaining areas or in groups around the garden. It is a robust grower, and tolerant of heat and humidity. In the cooler months and more temperate areas it will tolerate more sunny positions. Heuchera 'Sugar Plum' will grow to a height of 25-30cm and a width.

LAVENDER

Purple Reign

Snow Princess

The Queen

Lavender, a beloved herbaceous plant known for its fragrant foliage and beautiful flowers, comes in numerous cultivars with varying characteristics such as flower color, size, and growth habit. Plants Management Australia (PMA) is dedicated to sourcing and promoting top-tier plants for Australian gardens and landscapes. Every plant bearing the PMA logo undergoes rigorous field testing to ensure exceptional performance in both garden beds and containers.

COPROSMA

Coprosma is a genus of flowering plants native to New Zealand and some Pacific islands. These evergreen shrubs are known for their glossy, colorful foliage and small, inconspicuous flowers. They come in a variety of leaf shapes and colors, ranging from green to shades of red, orange, yellow, and variegated combinations. Coprosma plants are often used as ornamental shrubs in gardens, landscapes, and containers. They are typically low-maintenance and can tolerate a range of growing conditions, including coastal. They are a popular choice for adding year-round colour interest to gardens and landscapes.

Pacific Sunset

Sahara Jewel

Sahara Ruby

Pacific Sunrise

AGONIS FLEXUOSA AFTER DARK

An Australian Native commonly known as 'Jervis Bay Afterdark' as it reflects the colours of the night. This particular variety produces spectacularly lush foliage, shaded a deep burgundy, changing with the season with flushes of bright claret and purple foliage deepening to dark burgundy in winter. During late spring it houses clusters of petite white flowers that peek through the dark foliage, making them a popular choice for adding year-round interest to gardens and landscapes.

THRYPTOMENE

Pink Cascade

Pink Lace

Baeckeacea

Paynes Hybrid

Thryptomene typically feature small, star-shaped flowers that bloom profusely, often emitting a pleasant fragrance. Thryptomene species are prized for their hardiness and adaptability to various soil types and climates, making them popular choices for landscaping and garden enthusiasts seeking low-maintenance yet visually appealing options.

CALLISTEMON

Macarthur

Little Jet

Callistemons (Bottlebrush), with their vibrant flowering spikes and adaptable nature, offer low-maintenance beauty to gardens while attracting a variety of wildlife are a popular choice in landscapes. Little Jet and Macarthur are two small growing cultivars within the Callistemon genus, each offering distinctive characteristics that make them stand out in garden landscapes. 'Little Jet' is prized for its compact growth habit, making it an excellent choice for smaller gardens or container planting. In contrast, 'Macarthur' boasts a more tidy upright form, adorned with elegant weeping foliage and vibrant red flower spikes. Both 'Little Jet' and 'Macarthur' exemplify the versatility and beauty of Callistemon plants.

White Out

HARDENBERGIA

Hardenbergia, commonly known as the Australian Wisteria, is a versatile and charming vine native to Australia. Belonging to the pea family (Fabaceae), Hardenbergia is admired for its attractive foliage and abundant clusters of pea-like flowers that bloom in late winter to early spring, adding a mass of color and vibrancy to the garden when many other plants are dormant. Available in shades of purple, pink, and white, these flowers attract pollinators such as bees and butterflies while providing visual interest.

Happy Wanderer

Meema

Sea of Purple

Silver-leaved Eremophilas, a selection of the diverse emu bush genus native to Australia, shine in winter landscapes. Renowned for their shimmering foliage, these varieties add elegance and offer practical benefits. Their silver leaves reflect sunlight, helping retain warmth and protect against frost damage. Some types even bloom with tubular flowers in winter, adding colour and attracting pollinators. Overall, silver Eremophilas are prized for their ability to withstand cold temperatures, making them valuable additions to winter gardens. With their resilience, beauty, and ability to thrive in colder climates, silver Eremophilas emerge as invaluable assets for creating vibrant and resilient winter gardens that continue to captivate and inspire year-round.

EREMOPHILA

Nivea Spring Mist

Pink Pantha

OSTEOSPERMUM

African Daisy

Osteospermum, also called African daisies, have colorful vibrant daisy-like flowers in shades of purple, pink, white, and orange, blooming in spring and summer. Easy to care for, they thrive in sunny spots with good drainage and are popular for gardens, borders, and containers.

ARGYRANTHEMUM

Sunny Days

Super Duper

These Federation Daisy varieties, bred in Australia for Australian conditions, boast high flower counts, repeat flowering, disease resistance, and harsh weather tolerance. Some with stunning double flowers reaching up to 7cm in diameter, they offer the same beloved characteristics of the Federation Range but with added visual impact and spectacular colors. Plus, requiring minimal watering, they're the perfect fuss-free choice for any garden.

Sunday Best

Superior Purple

Pink Posy

JASMINUM POLYANTHUM

Climbing Jasmine

Jasminum polyanthum, also known as pink jasmine, is a highly fragrant climbing vine cherished for its clusters of delicate, star-shaped blossoms. Originating from China and Burma, this evergreen plant blooms in late winter to early spring, emitting a sweet and intoxicating scent. Its pristine white flowers, tinged with pink, contrast beautifully against glossy green foliage. Resilient and easy to grow, it's a popular choice for trellises and arbors, attracting pollinators while evoking a sense of romance and nostalgia in gardens.

Local Hero

Embrace the Essence of Native Elegance in Your Landscape

In collaboration with Helix Australia, the proceeds from each sale of the Waxflower 'Local Hero' will be allocated to the SAS Resource Fund. This fund plays a vital role in supporting both active-duty and former members of the Australian Defense Force, as well as their families, who have encountered disability or loss due to their service with the Special Air Service Regiment. This generous endeavor, which aligns with our ethos of community engagement, complements our existing support for service personnel, exemplified by the Grevillea Spirit of ANZAC. Bred by Kings Park and Botanic Gardens, the Chamelaucium Local Hero PBR represents botanical elegance. With its glossy red buds giving way to profuse pink blooms set against its lush foliage, this native shrub adds a touch of grace to any landscape. Notably adaptable to a variety of environmental conditions, including coastal areas and sunny exposures, Chamelaucium Local Hero PBR thrives with minimal maintenance, making it an excellent choice for both novice and seasoned gardeners. Furthermore, its endurance against hot, arid climates and low water requirements enhance its resilience and suitability for diverse landscapes. Beyond its aesthetic appeal and practicality, Chamelaucium Local Hero PBR symbolizes our unwavering commitment to horticultural excellence.

GERALDTON WAX

CHAMELAUCIUM

The flowers of Chamelaucium species are typically small and bell-shaped, often resembling delicate wax formations, hence the common name "waxflower." They come in a variety of colors, including shades of white, pink, and purple, adding a vibrant and charming touch to gardens, landscapes, and floral arrangements alike.

INDOOR/ SHADE OASIS

When it comes to indoor and shade plants, there are many options available that can cater to different tastes and environments. These plants not only add aesthetic value to indoor spaces with limited natural light, but also offer several benefits. For instance, species like the snake plant and peace lily possess robust air-purifying capabilities, while pothos and spider plants boast graceful trailing foliage. Each variety has its unique charm to offer. The lush greenery of ZZ plants and ferns adds elegance and texture. It is evident that popular indoor and shade plants are not only visually pleasing, but also contribute significantly to creating healthy and vibrant indoor environments that everyone can enjoy.

RAVEN

ZZ Raven, the latest member of the Zamioculcas family, introduces a captivating aesthetic with its deep black leaves reminiscent of the majestic bird from which it draws its name. Renowned for its resilience, this plant thrives in various environments, from sleek modern interiors to busy office settings. Its glossy foliage adds a touch of elegance to any space, while its ability to withstand occasional forgetful watering makes it an ideal choice for those with a busy lifestyle. ZZ Raven stands strong even during periods of neglect, ensuring it remains a striking and low-maintenance feature in any room.

ZANZIBAR GEM

Often referred to as the 'ZZ Plant', Zamioculcas zamiifolia is an exceptionally resilient perennial, featuring glossy, green, elliptical leaves emerging from elongated fleshy stems. Thriving on minimal care, it withstands neglect effortlessly, enduring drought, dry air, and low light conditions with ease. Additionally, its robust nature makes it highly resistant to pests, necessitating little maintenance. It's advisable to refrain from overwatering, particularly in cooler seasons. Whether as a potted accent in homes and offices or planted in shaded garden spots, ZZ plants serve as an excellent addition, adding greenery with minimal fuss.

DARK ZAMICRO

Dark Zamicro, a unique member of the Zamioculcas genus. This striking plant boasts a compact, upright growth habit, with its glossy leaflets showcasing a rich, almost black hue, adding a touch of drama to any space. Notably, it thrives even with intermittent watering, relying on its stored reserves in roots and rhizomes to endure periods of drought. As a dwarf variety, it reaches heights of up to 80cm and spreads to approximately 50cm wide, making it a versatile choice for various indoor or outdoor settings.

BRACHYCHITON

Brachychiton, commonly known as the Kurrajong or Flame Tree, is a genus of flowering trees native to Australia and surrounding regions. Renowned for its striking appearance, the Brachychiton boasts large, bell-shaped flowers that vary in colour from vibrant reds to soft pinks and creamy whites, depending on the species. Its distinctive foliage, often in the form of broad, lobed leaves, adds to its allure. Beyond its ornamental value, many Brachychiton species play vital ecological roles, providing food and shelter for various wildlife species. Additionally, several indigenous Australian cultures utilize parts of the Brachychiton for traditional medicinal purposes, highlighting its cultural significance. With its captivating beauty and ecological importance, the Brachychiton stands as a testament to the rich biodiversity of Australia's native flora.

AUSTRALIAN NATIVES

Cupaniopsis and Eucalyptus stand out for their ability to thrive in the cooler temperatures and variable conditions. Characterized by slender trunks and glossy foliage, Cupaniopsis are an outstanding shade tree, producing delicate bell-shaped flowers during winter. Similarly, the iconic Eucalyptus, with their towering height and unique bark patterns, endure the winter chill, providing vital habitats and sustenance for native wildlife. As temperatures drop, these native trees play a crucial role in maintaining ecological balance, contributing to soil health and providing shelter and food for a myriad of species. Their resilience and adaptability exemplify the intricate relationship between flora and climate in Western Australia, underscoring the importance of preserving and appreciating the region's rich biodiversity.

TRADEMART

Benara Nurseries manages an expansive 147 hectare property solely dedicated to containerized plant stock. Our dedication to customer satisfaction shines through our strategically located Trademarts, positioned both north and south of the Swan River. These Trademarts offer convenient access to our wide array of plant varieties, seedlings, and mature trees. We further enhance customer experience with daily cash and carry specials and a team of knowledgeable and supportive staff.

To streamline the process for our customers, we accommodate pre-arranged pick-up orders with just 48 hours' notice, ensuring a smooth transaction. Our Trademarts also boast a diverse range of complementary garden products. Additionally, our nursery is designed with ample parking and easy access to our plants, making trolley usage effortless.

TERRACOTTA

Where artisans blend a rich thousand-year-old tradition with contemporary innovation and Italian ingenuity to craft exquisite terracotta pieces. These creations not only age gracefully but also enhance any home or garden space, whether indoors or outdoors. With a blend of uniqueness and functionality, these pots and planters are ideal for floristry arrangements or as charming pot covers for gifts. Sealed and waterproof, they feature no drainage holes, eliminating the need for saucers. However, it's advised to exercise caution when planting large specimens due to the absence of drainage.

Traditional handmade terracotta pottery exudes authenticity and character, crafted with time-honored techniques passed down through generations. Each piece reflects the artisan's skill, adding warmth and personality to any space. With their natural, earthy appeal, these pots and planters create a rustic ambiance, evoking a deep connection to the earth and artisanal craftsmanship. Ideal for practical use or decoration, these traditional treasures bring artisanal beauty to any environment.

OUR REVEGETATION DEPARTMENT

Benara Nurseries is deeply committed to restoring natural habitats, a passion that has driven us to establish a dedicated native tubestock department. Our team has extensive experience and knowledge within this department, enabling us to propagate and deliver top-quality native tube stock essential for revegetation and landscaping projects.

Our focus extends across various environments, incorporating metropolitan and regional areas alike, including coastal zones, wetlands, riverbanks, woodlands, hills, post-harvest pine forests, and reclaimed farmlands. We pride ourselves on addressing both the technical and aesthetic aspects of habitat restoration, harnessing the expertise of our seasoned propagators to produce a diverse array of species, not limited to but including those native to the Swan coastal plain.

Benara offers tailored solutions ranging from smaller, provenance-specific batches to large-scale volume contracts, ensuring the highest standards of quality and adaptability. Emphasising the importance of seed propagation for genetic diversity and resilience, our revegetation stock epitomizes excellence in environmental restoration efforts.

As corporate members of the Revegetation Industry Association of WA (RIAWA), we actively contribute to the ongoing improvement of industry standards and environmental sustainability practices.

With the planting season underway, our Revegetation Department is experiencing a notable increase in demand, encouraging clients to promptly secure orders for Winter 2025 contract growing. Excitingly, we are expanding our revegetation department to accommodate growing demand, underscoring our unwavering commitment to the environment and habitat restoration.

TERMS AND CONDITIONS

TRADING TERMS

The monthly TRADE price list applies to TRADE ID CARD holders. All TRADE clients must show TRADE ID CARD at time of purchase. WHOLESALERS must show business ID with each purchase. TRADE REFERRALS must provide a letter of referral on the company letterhead of the referrer. WHOLESALERS must be charged 'Wholesale Price' unless accompanied by the referrer. WHOLESALERS clients can not refer clients. All prices quoted are Trade prices excluding GST. Benara Nurseries will not accept any responsibility for damage to stock once it has been delivered to a transport company. Claims relating to any damages should be addressed with the carrier. If plants are personally selected by the client from the stock line for delivery or pick up, will be held no longer than 48 hours, due to plant care requirements.

CASH AND CARRY

Cash and Carry Discount is offered to all TRADE and WHOLESALERS customers. Discount DOES NOT apply to selected stock, specials, allied garden products, pottery, stones and artificial turf. All stock purchased needs to be paid for and taken on the day. No holding stock. CARABOODA
5% Cash & Carry discount on plant stock up to and incl. 30lt, selected and taken from the Trademart.
5% Cash & Carry discount on plant stock from 35lt to 500lt, selected and taken from the Trademart.
FORRESTDALE
5% Cash & Carry discount on plant stock up to and incl. 30lt, selected and taken from the Trademart.
5% Cash & Carry discount on plant stock from 35lt to 500lt, selected and taken from the Trademart.

PICK UPS

Pre-organised pick ups must be a minimum of \$150.00 in value. Pick up orders must be placed 48 hours prior to pick up time. If you require a pick up before this time please contact our sales staff. FORRESTDALE
Pick up orders must be placed 72 hours prior to pick up time. Pots up to 15cm must be ordered in multiples of 4. 17cm and 5lt pots must be ordered in multiples of 3 or 5. If minimum quantity is not met, Benara has the right to increase the minimum quantity order without notice. All pickups that are not picked up on the required date will incur a 20% handling fee. Advanced Trees are available for viewing/pick-up between 7.00am – 3.30pm on Monday to Friday only. All advanced tree orders and viewing must be booked through the office sale staff.

SATURDAY TRADING

OPENING HOURS 7.30AM – 2.00PM.
All sales are strictly from the sales display area only. Staff and customers do not have access to the growing nurseries on SATURDAYS. Pre-organised pick ups are available between 7.30AM - 1.00PM. All advanced tree orders and appointments are weekdays only. Book a viewing with the office sales team between 7.00AM - 3.30PM, Monday to Friday only.

DELIVERIES

Seedling deliveries in tray quantities only. 48 hours notice required for general stock deliveries. Orders must be placed with Sales Office before 3.30pm on Mondays – Friday. Kerb side deliveries only, up to and including 30lt bag/pot size. Pots up to 15cm must be ordered as a minimum of 4. 17cm and 5lt pots must be ordered as a minimum of 3. If minimum quantity is not met, Benara Nurseries has the right to increase the minimum order quantity without notice. Deliveries are unavailable from the Forrestdale Trademart.

DELIVERY TO BUNBURY & SURROUNDING AREAS

Scheduled delivery dates to Bunbury are Monday, Thursday and Friday. For Monday deliveries, orders need to be placed by Thursday the week prior. Deliveries cannot be guaranteed to Bunbury on Mondays as often the trucks are full with deliveries for further south. Current month's delivery schedule available online.

REVEGETATION CELL TRAYS

Orders for Cell trays will be charged as follows and credited upon return of the tray: 64 Cell
tray = \$5.00 (64CELTRA); 104 Cell tray = \$7.00 (104CELTRA).

ADVANCED TREE STOCK DELIVERY

Deliveries above 30lt bag/pot size. Minimum delivery charge \$199.00 or 5% of order value, whichever is greater. Delivery boundaries: Within Perth metropolitan area. Outer metropolitan deliveries by prior arrangement. Delivery days Monday to Friday depending on load capacity.

STONES

Full stone pallets only. Customer must have a forklift at the delivery site to unload stock. Delivery Schedule and Charge
Northern suburbs \$95.00 ex GST, additional pallets will be charged \$45.00 per pallet. Southern suburbs \$145.00 ex GST, additional pallets will be charged \$45.00 per pallet.

POTTERY

Delivery not available for pottery items. Benara can pack for a courier to collect at a cost of \$50.00 per pallet to pack. If the customer would like the pottery delivered to a transport company a packing and delivery charge of \$150.00 will be applied.

RESERVED STOCK

Only quantities above 50 plants will be reserved and held in 13cm – 12lt pots. For all other reserved contract grown stock conditions, please see your Salesperson.

RETURNS AND CANCELLATIONS

No tree will be accepted back under any circumstances if it has been taken out of the bag, as this is against accreditation standards. Benara Nurseries reserve the right to charge a handling fee of 20% for all returns, cancellations and amendments. Stock may only be returned at the point of delivery and only by the approval of management. Approved returns within 24 hours for faulty product will be refunded. No credits will be given for customer change of mind or incorrect size if not returned in good order and condition within 48 hours. Benara Nurseries will not accept any responsibility for damage to stock once it has been delivered to or picked up by a transport company. Claims relating to any damages should be addressed with the carrier.

IMPORTANT

Refer also to 'Terms and Conditions' of sale on Benara Nurseries website.
